

Tell us what **pancreatitis** questions you want answered!

We need your help.

We need your input to identify priorities for research in the diagnosis, treatment, management, and support for people with pancreatitis.

Guts UK is working on a 'Priority Setting Partnership' (PSP). This has never been done for pancreatitis before and will ignite true, lasting change.

With input from patients, carers, family and healthcare professionals, we will identify the **top 10 priorities for future research into pancreatitis** (UK & Republic of Ireland).

Deadline:
Monday
31st January
2022
